Jamaica Script

ELEGANT
SPENCERIAN
FONT

THANK YOU FOR PURCHASE!

*Elvis recorded 31 takes of Hound Dog. And this is only take #1
of Jamaica Script. If you want more variants of particular letters
or have ideas how I could improve my font, please let me know
via PM. I'd be happy to serve you better*
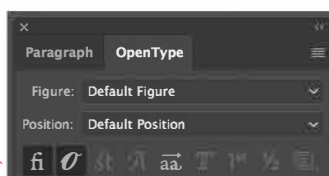

INSTALLATION & SETUP

[Installing fonts on Mac](#)

[Installing fonts on Windows](#)

Jamaica Script mimics classic Spencerian handwriting, with begining and finishing strokes in every word. It also has a lot of ligatures, that should be enabled by default. Here is how you do that:

These feauters should
be turned ON

Access them in **Illustrator**: Window->Type->Open Type
Access them in **Photoshop**: Window->Character

*Sometimes you have to do it twice: turn the feature off, then
back on, so that it worked right*

Created by [Vatesdesign](#)

By default Jamaica Script core features will be disabled in Microsoft Word. Here is what you should do to enable them.

1. While in Word press Ctrl+D to open Font Properties
2. Select Jamaica Script in the Font List - this is the font list
3. Check the respective checkboxes as on picture below:

Kerning must be on for your selected size

Turn on Standard ligatures

And Contextual Alternates should also be on

1. Use Jamaica Script at Big Size. Otherwise, fine strokes will look&print too thin.

Smalô yjn *Biggeq*

2. Use Jamaica Script to create **Emphasis**.

THERE SHOULD BE OTHER TEXT
AS A BACKGROUND FOR

Emphasi' q

3. For lettering consider using Capital and lowercase letters at different sizes.

Menr Everything at 37pt

Mi m Cap at 37pt, text at 23pt
